

ART VIEWER LICENSE: BENEFITS

What are the benefits of an ART Viewer License?

ART, the Advanced Reporting Tool, is offered through our HMIS vendor, Bowman Systems. ART enables Bowman Systems to pull our local BAS-Net data from ServicePoint into an easy to use platform for the HMIS System Administrator.

ART trainings are rather extensive and technologically “heavy,” so rather than training Agency Administrators on how to create their own reports, we are able to offer Art Viewer Licenses.

As an ART Viewer License user:

- You are able to have ART Reports sent automatically to your ART Inbox on a daily, weekly or monthly basis;
- You are be able to monitor your data on a regularly scheduled basis;
- You can request specific reports to be created that can be sent automatically to your inbox on a scheduled basis;
- You're able to experience the benefits of ART and its report programming, without actually having to create the reports and learn the functionalities;
- You get the end product: a formatted and finished report!

If you are interested in learning more...

You can log onto the Homeless Alliance of Western New York website, www.wnyhomeless.org, under Programs, under BAS-Net, there is a section dedicated to “ART”. In this section, you can read about what an ART Viewer License is, what current reports are available on ART and the form to have a report create specific for your agency!
